

INSTANT BOX

INSTANT SUITE

Instantly visualise the availability of your spaces

Non-bookable spaces (bubbles, phone booth, collaborative spaces...) can be used temporarily as workspaces. A LED installed above the entry indicates **if this space is free or occupied**. The motion sensor associated and synchronized with Instant Booking, replicated the information **in real time** on the GroomPad and the Instant Mobile interactive portal.

At a glance, **you will find the free box** you need.

Save time for your employees

Immediate visibility of occupied or available spaces

Optimisation of space management

Real time information update

Instant Box allows real estate managers and users to:

- **Manage** non bookable rooms easily.
- **Find** non bookable meeting rooms on interactive 3D maps via RoomPad® and GroomPad.
- **Identify** from afar the status of meeting rooms thanks to the LED placed above the doors.
- **Availability** is indicated by the color. Red is busy, Green is free !

- Fully integrated to Instant Booking, Instant Box offers you the possibility to **visualise the status of non bookable (and bookable) meeting rooms on Instant Mobile**, our smartphone application. You also have access to **real time metrics** allowing you to see the use of all your workspace and optimise their usage.
